SEWING THREAD

COTTO 80/500m

Ecological and natural products are all the rage now! Eco fashion has arrived to the clothing industry too. Cotton thread is most commonly used for sewing goods made of natural fibres such as cotton, flax or silk. In order to meet clients expectations we have prepared **COTTO 80** thread.

COTTO 80 is typical sewing thread made of 100% long staple cotton. Process of meracerisation provides high quality sewing and durability of the seam.

COTTO 80 threads fulfill the requirements of the safe product included in the legislation in force.

Technical data		Average linear mass of the threads	Minimum average tensile strength	Make - up	Recommended needle size
Article	Dtex x ply
