

COTTON THREAD

100% cotton

COTTON THREADS are typical sewing threads. The threads are made of long staple cotton. Process of mercerisation provides high quality sewing and the strength of the seams. Recommended for sewing goods made of natural fibres (cotton, flax), subjected to later dyeing processes. Cotton thread performs particularly well in products made of flax (table napkins and runners, curtains), as well as products made of mixed fabric containing both flax and cotton.

COTTON THREADS
fulfill the requirements of the safe product
included in the legislation in force.

COTTON THREADS are recommended for sewing of:

COTTON THREAD 12 x 2

- lingerie,
- bed linen,

COTTON THREAD 12 x 3

- corsetry,
- cotton and linen clothing,
- thin cotton fabrics.

COTTON THREAD 30 x 4

- textile shoes,
- haberdashery (bags, rucksacks),
- technical products,
- commonly used in crafts (napkins, tablecloths, curtains).

Technical data:					
Article	Tex x ply	Average linear mass of the threads	Minimum average tensile strength	Make - up	Recommended needle size
	tex	tex	cN	m	No.
cotton thread	12 x 2	24	550	5000, kg	80
cotton thread	12 x 3	37	860	1000, 5000	90
cotton thread	30 x 4	114	2 800	1000, kg	120

Available colours: white, natural, black (30 x 4 only).

Make up: crosswound on tubes or cones.
