

MFiI - is the monofilament thread. It is used for invisible seam. It is the perfect choice for use whenever the stitches need to be invisible. Monofilament can be used for blind stitch machines. It is also good for overlock, particularly for hemming the sampled of fabric, then there is no need to match the colour of threads. It is also applied for injection moulding in shoes production and handicraft.

MFiI is recommended for:

MFiI 0,08

- hemming of trousers, skirts, pockets on jackets;

MFiI 0,10

- covering seams;

MFiI 0,12

- curtain;

MFiI 0,16

- hemming of carpet;

MFiI 0,20

- injection moulding in shoes production;

- handicraft (e.g. beading, soutache, bead stringing).

<i>Technical data:</i>					
Article	Dtex x ply	Average linear mass of the threads	Minimum average tensile strength	Make - up	Recommended needle size
	dtex	dtex	cN	m	No.
MFiI 0,08	91 x 1	91	380	650, 11 000	70
MFiI 0,10	104 x 1	104	400	650, 9 000	70
MFiI 0,12	145 x 1	145	700	500, 6 000	70
MFiI 0,16	219 x 1	219	1 000	270, 6 000	80
MFiI 0,20	346 x 1	346	1 400	150, 6 000	90

MFiI is supplied on King spools and "snap" spools (150m, 270m, 500m, 650m).
